

CLOSET SHELVING · CLEAT DETAIL

Cleat on a Middle Bulkhead

How the shelf side-cleat is cut and set where a shelf run crosses a middle bulkhead.

Cut & fasten

Side cleat	1×4 material, 14" long (standard shelf depth)
Front corners	dogear the exposed corners on 1×4 cleats
At the bulkhead	cleat runs the full 14" - the bulkhead lands on top
Fastening	hit a stud at every cleat and bracket wherever possible

MIDDLE BULKHEAD

At a middle bulkhead the side cleat runs the full **14"** shelf depth. Dogear the exposed front corner.
