

TRIM CARPENTRY · STAIRS & LANDINGS

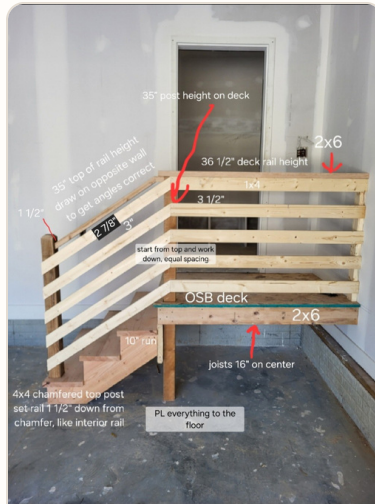

Garage Landing Standards

Framing and rail dimensions for a standard interior garage landing and steps.

On the job

Framed landing, rail set, ready for finish

Rail layout - equal spacing, worked top-down

Key measurements

Post height	35" on the deck
Deck rail height	36 1/2"
Rail height	35" top of rail - keep consistent top to bottom
Framing	41" wide, 1" OSB overhang
Joists	16" on center
Step run	10"

Build notes

Top post	4x4 chamfered. Set the rail 1 1/2" down from the chamfer, like an interior rail.
Rail layout	Start from the top and work down with equal spacing. Draw lines on the wall to set post and rail height so it stays consistent.
Fastening	PL (construction adhesive) everything to the floor.
Stock	2x6 deck framing, 1x4 rails.
