

CLOSET SHELVING · REACH-IN LAYOUT

Standard Split Reach-In Closet

Double-hang on one side, single-hang plus a top shelf on the other. The everyday bedroom reach-in.

Split reach-in: one double-hang bay, one single-hang-plus-shelf bay. Heights from finished floor.

Build to these heights

Double-hang bay	rod & shelf at 80" and 40" 2R2S - 4 pieces
Single-hang bay	rod & shelf at 65" , shelf only at 80" 1R2S - 3 pieces
Center bulkhead	80" tall · shelves 12" deep
Cleats	1×4, 14" side cleats - hit studs wherever possible

WHY SPLIT IT

A "split" reach-in gives long-hang on one side (dresses, coats) and folded storage over short-hang on the other.
