

CLOSET SHELVING · STANDARD HEIGHTS

Pantry Shelf Heights

Pantry cleat heights, built around one shelf at countertop height with room for appliances.

Cleat heights from floor

Standard (5 shelves)	17 1/4 / 35 1/4 / 54 / 69 / 84"
10' + ceiling	add 99" for a 6th shelf
Counter shelf	cleat 35 1/4" puts the shelf top at 36"
Bottom shelf	cleat 17 1/4", shelf top at 18"
Above the counter	18" clear for appliances, then 15" per shelf

THE COUNTERTOP-HEIGHT SHELF

A kitchen countertop finishes at 36" (a 34.5" cabinet plus a 1.5" top). Match it: with a 3/4" shelf, set the cleat at **35 1/4"** so the shelf top lands at 36". Leave 18" of clear space above it for blenders and other counter appliances, then step up 15" per shelf.
